Certified Information Systems Security Professional (CISSP)

Background

Jared Weber, CISSP, QSA, is a Senior Manager for MNP in the North Mississauga office where he is a leader within the Cyber Security team. With over 15 years of experience, Jared has extensive knowledge of information security, networking, IT architecture, security framework design, integration, and support utilizing industry recognized diagnostic approaches and tools. Jared's knowledge allows him to quickly and expertly inspect system architectures, identify vulnerabilities, assess risks, and recommend safeguards to mitigate risk to information assets.

He serves as a project lead for large engagements, and a senior consulting resource to customers requiring Cyber Security guidance, and is responsible for the creation and development of the MNP Maturity and Threat Analysis program.

PCI has been a focus area for Jared since its increased compliancy push in Canada and he has been a point resource for multiple organizations requiring assistance with becoming, and remaining, compliant.

Jared's drive is to provide customers with cyber security advice, solutions, and products that well meet and exceed their needs while also providing maximum risk reduction. Jared achieves this by working closely with his Client's team and their business to fully understand their existing cyber security posture and most likely points of exposure.

Service Line

Jared has a broad range of knowledge within Cyber Security allowing him to lead large diverse projects including risk assessments, vulnerability and penetration testing, compliance audits, solutions and product deployments, and senior cyber security management consulting.

Industry Experience

Jared has developed deep industry knowledge within the public safety sector working with services across Canada for 15 years. Jared has also developed integral solutions for municipal, financial, healthcare, and the energy sector.
