

NEW SUPPORT FOR LOCAL BUSINESS

George Brown College is excited to announce a new grant available to support companies. This funding supports many types of projects, including:

- Innovation support for your company's growth
- Innovation for mechanical/electrical integration, embedded software / IoT, equipmentbased product development, and mechanical / physical prototype fabrication
- Substantial improvements on existing technology will be considered

Eligible partners must be a Canadian corporation. Preference will be given to manufacturers, but companies not engaged in manufacturing are welcome to apply.

Funds:

- Up to \$20,000 is available per company for eligible projects
- Minimum 20% cash contribution from the client, depending on research requirements

No application is necessary! To get started, reach out to [Arbab Khan, PDX's Manager, Industry Liaison and Business Development](#).

REACH OUT TODAY

We get industry into market.

Do you have an idea PDx can help you realize?

With this new funding, our capacity has grown.
